DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 14-19 and 25-27 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claim 19 recites the limitation "the elongated slit opening" in lines 2-3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 14-19 and 25-27, as best understood by the examiner, are rejected under 35 U.S.C. 102(b) as being anticipated by Ruben USPN 5019070.

As to claims 14-16 and 25-27, Ruben discloses a disposable absorbent article capable of being worn about the lower torso of a wearer including a body-facing surface 18, a backsheet 20 having a garment-facing surface ad body-facing surface; a first waist region 14 with a first end edge 24; a second waist region 16 with a second end edge 24; and a crotch region 12 interposed there between. The article further comprises at least one internally visible serviceable indicium 26 disposed on the body-facing surface of the absorbent article, which aligns with an anatomic feature of a wearer during fitting (col. 3, lines 32-44 Figures 1 and 2); and a core 22 disposed on the body-facing surface of the backsheet.

As to claim 17, the presence of the gathers 30 (Figures 1 and 3) create an elastically foreshortened topsheet, at least in the areas of the gathers, as broadly as claimed.

As to claim 18, the article comprises elongated slit 18, which aligns relative to an anatomical feature of the wearer (col. 3, lines 10-24 and 46-51).

As to claim 19, the indicium 26 indicates which part of the thick portion is placed relative to the anatomical feature of the wearer (col. 3, lines 32-52).

Allowable Subject Matter

7. Claims 2-9 and 23 are allowed.
